CONFIGURE MOZILLA TO UPDATE AUTOMATICALLY

- 1. Log on to the computer on which the configuration is to be made.
- 2. Double-click the Mozilla Firefox icon to initialize the web browser.
- 3. Once opened, click the **Firefox** button at the top left corner of the window.
- 4. From the displayed menu, go to the **Options** > **Options** option.

- 1. On the opened **Options** box, click to select the **Advanced** icon from the displayed icon bar.
- 2. Once on the **advanced** interface, click the **Update** tab.
- 3. Under the **Firefox updates** section, click to select the **Automatically install updates** (recommended, improved security) radio button.
